## About Me

Cybersecurity professional with a decade of high-pressure operational experience in incident response, policy enforcement, and team leadership.

Specializing in incident analysis, security hardening, and penetration testing. Expert at translating complex technical findings into clear reports.

## Technical Skills

**Operating Systems:** Linux (Arch, Debian/Ubuntu), Windows Server, Windows Desktop, macOS (implied, but you can add if comfortable).

**Networking & Security:** TCP/IP, VLANs, VPNs, Firewall Rules, Static Routing, Wireshark, Cisco Packet Tracer, Active Directory, Vulnerability Assessments, Threat Modeling.

**Tools & Platforms:** Kali Linux Toolkit, Metasploit, Wifite, Aircrack-ng, SecurityOnion, Rancher, Virtual Machines (VMware/VirtualBox).

**Core IT Competencies:** Hardware Troubleshooting, POS Systems, Identity Verification, Policy Enforcement, Log Analysis, Incident Response.

## Projects

### LoRA K3S Cluster | Capstone (In Progress) | Apr 2026

- Led technical team in designing and deploying a portable Kubernetes cluster on Debian-based Mini PC running Ubuntu Server VM with Rancher for integrated secure mesh communications network.
- Implemented infrastructure security including RBAC, network policies, firewall rules, and encrypted data transmission.
- Configured and troubleshot complex network environment: VLANs, static routing, switch configuration, and VPN remote access.
- Integrated LoRa radio hardware for encrypted long-range communications in bandwidth-constrained environments.
- Created comprehensive technical documentation and testing protocols for both operational and security validation.

### Website Report: Bulldog Industries | March 2026

- Conducted black-box test using Kali Linux, cracked SHA-1 hashes, bypassed developer shell, and escalated root via hardcoded credentials.
- Delivered comprehensive report with rebuild recommendation.

### Wireless Penetration Testing | Dec 2025

- Conducted authorized penetration tests on wireless routers using Arch Linux, wifite, and the aircrack-ng suite.
- Performed reconnaissance and attack simulations with tools including medusa, reaver, nikto, and netcat.
- Researched exploits using searchsploit.

### Physical Security Assessment | Dec 2025

- Authored a security report detailing perimeter security, access controls, and surveillance recommendations.
- Focus on server room protection and ingress/egress points.
- Report provided a layered defense strategy for a simulated client handling sensitive government data.

### Security Incident & Alert Analysis | March 2025

- Analyzed SecurityOnion logs in a simulated environment to identify attack patterns, correlate events, and determine Indicators of Compromise.
- Documented findings and response recommendations in a comprehensive incident report.

## Education

### Cybersecurity Diploma

NSCC Waterfront Campus

**Sept 2024- May 2026**

**Courses:** Network Security, Web Security, Vulnerabilities & Exploits, Incident Response & Planning, Penetration Testing, Security Auditing, Wireless Security, Database Security

### Business Administration Diploma

NSCC Marconi Campus | **2016**

**First year completed.**

- Awarded Best Business Plan of 2016
- Successfully completed advanced assessment in Microsoft Access.
